

**Amendment to the Specification:**

On page 8, lines 15-20, please replace with the following paragraph:

The cap 46 can be placed onto the electrical connector 42 before or after assembling the connector 42 to the printed circuit board 36. The cap 46 provides a protective cover for the connector 42 when the printed circuit board 36 is handled and transported. ~~The cap 46 remains attached after mating the connectors 40 and 42.~~
